## Burns Sci-Tech

Burns Science & Technology Charter School in Oak Hill, Florida is an A-rated, tuition-free, nonprofit K-12 public charter school with a concentration in EiSTEAM and project-based learning.

**At Burns Sci Tech, our mission is to cultivate learners and leaders who are inspired, able, and prepared to make a positive difference in the world.**

Beginning in Kindergarten, **our Elementary** students experience an expanded range of courses that include Information Technology, STEM, Marine Science, Physical Education, Literacy Lab, Leadership, Music, and Art. These diverse offerings are designed to spark curiosity, nurture creativity, and build foundational skills across a wide range of disciplines. This well-rounded exposure lays the groundwork for deeper learning as they move into our Junior High Archways.

Our **Junior High** program is designed with the future in mind. Through our innovative Junior Archways, we mirror the structure and expectations of our high school to create a seamless academic transition. These Archways not only introduce students to rigorous, focused study but also provide opportunities to discover the learning environments where they thrive. By the time BST students reach high school, they are not only prepared to learn; they're confident, capable, and ready to lead.

In **High School**, students select one of three ARCHways, each designed to match their unique learning style and align with their future career goals.

**Entrepreneur:** This ARCHway builds practical business skills and offers students the chance to earn industry-recognized credentials. Through our TRADE program, many students learn directly from local tradesmen and business professionals, gaining valuable hands-on experience. Graduates are ready to enter the workforce or pursue advanced vocational training with confidence.

**Scholar:** This rigorous path is designed for college-bound students, emphasizing critical thinking, research, and time management. Admission requires an application and interview to ensure readiness for advanced coursework. Many BST Scholars also complete AP Capstone, a College Board program that develops advanced research, collaboration, and presentation skills. Scholars graduate with a strong foundation for higher education and stand out in the college admissions process.

**Innovator:** A flexible ARCHway that blends academic rigor with career readiness. Students can graduate with both a high school diploma and an Associate of Arts (AA) degree, while also taking AP courses. By combining dual-enrollment and advanced coursework, graduates are well prepared for success in college and future careers.

### Our Impact

#### Our Students

We are proud to serve over 1,100 students from Kindergarten through 12th grade. Our students reside throughout Volusia and Brevard Counties

#### Our Community

Our innovative approach to education has enriched the surrounding community with empowered and skilled graduates.

#### Our Future

By preparing students with 21st-century skills, graduates are equipped to pursue higher education or enter high-demand fields.
